

# Roshith VK

## Senior Software Engineer

Seeking a career in an organization, having an environment that encourages continuous learning and provides exposure to new technologies, so as to achieve professional and personal growth along with the organization

## Experience

**Dec 2019 - Current**

Resemble Systems, Bangalore, Karnataka

### Projects Worked

- **Standard operating procedure Management** for Panda Retail Company - The project was build on SharePoint using HTML CSS JavaScript and jQuery. All the required data was stored in the SharePoint lists and we used REST api to do the CRED operations from the SharePoint list. The purpose of the project was to create a request for SOP or policy and helps the user throughout the approval process such as workflow of the project
- **Digital Workspace** for ITFC using React - Worked on the Digital Workspace of the project which was its 3rd workstream using Reactjs. I worked on components such as file attachment which helps the user to access the files from the system as well as the logged in users OneDrive, calendar which will display the meeting details of the logged in user, theme changer, user preferences and other important components and api integrations and functions and responsiveness.
- **Intranet Portal** for Savola - The project was build on SharePoint using HTML CSS JavaScript jQuery. All the required data was stored in the SharePoint lists and we used REST api to do the CRED operations from the SharePoint list. I worked on components such as directory which uses graph api to get the details of all the user in the organisation along with other major components such as Announcemet, News ,Admin Portal etc
- **Intranet Portal** for Qiddiya - Using ReactJs & SharePoint. The project was build on SharePoint using HTML CSS and ReactJS. All the required data was stored in the SharePoint lists and we used REST api to do the CRED operations from the SharePoint list. I worked on components such as Announcemet, News ,Admin Portal, Calendar, Frequently used apps, Gallery etc
- **Staff Social Club** for IDB Using ReactJs & SharePoint - Using ReactJs & SharePoint. Worked in designing the pages and components of the project, REST API integrations and creating functionalities for the project. The project was build with both SharePoint and Strapi as its backend and I worked on the SharePoint part of the project.
- **HADAF** (Project to manage minutes of meetings)- Using NextJS . Worked in designing the pages, API integrations and creating functionalities for the project
- **Qapco DMS** Project to manage the documents Using React js, SharePoint and Nintex. (Currently working). Working on the page creations, SharePoint lists, API integrations and creating functionalities for the project, and creation of Workflows for the approval and other processes.
